PROFILE

I am an experienced web developer focused on innovation and creativity and I enjoy turning a conceptual design into a practical and responsive webpage. I utilise the industry's cutting edge technology and best practices to deliver a unique and innovative website suitable for the client's needs. I am confident in using both open-source and bespoke content management systems. I am currently learning React in my spare time and have developed my portfolio site using it: <https://ben-foster.com/>. I graduated with a First Class Honours degree in Computing.
